Raised to Emergency Response Level**

The Centre of Health Protection (CHP) of the Department of Health writes to inform you that the Government has decided to raise the response level of the “Preparedness and Response Plan for Novel Infectious Disease of Public Health Significance” to the Emergency Level. In view of the latest situation, institutions/organisations are advised to heighten the prevention and control measures against infectious diseases. This Department would also like to remind DTRCs to heighten the prevention and control measures against infectious diseases and reinforce temperature screening in the centres. DTRCs should actively check the body temperature of all clients/residents on a daily basis, so as to identify those with fever. Residents with fever or respiratory symptoms should be advised to wear a surgical mask and seek medical advice promptly. Staff should also check their temperature before work every day, and those with respiratory illnesses or fever should refrain from work. Moreover, DTRCs are advised to check the body temperature of all visitors, and those with fever are not recommended to visit the centres. DTRCs should remind visitors to observe the prevention measures on infection control for combating communicable diseases and advise them to perform hand hygiene with alcohol-based handrub and wear surgical masks.
